Connecting Apple TV (AirPlay) from Windows

Note: Windows computers require AirParrot software to connect to an Apple TV. Please contact the IT Help Center if you need AirParrot.

1. Double click AirParrot2 if it is saved to your Desktop. If not, go to START menu. Scroll down until you see AirParrot 2 and select it.

![AirParrot2 Image]

2. A gray box will appear over the clock/calendar in the bottom right hand corner of your screen.

![Gray Box Image]

3. There will be a FROM and TO section in the gray box.

4. In the TO section, there will be a blank box (Quick Connect Code).

5. On the projector screen, the building, room number, and IP address will be displayed. The IP address that’s on the projector screen will need to be added in the Quick Connect Code box.

6. Click Connect.

7. A gray box will appear. Type in the 4-digit code that’s on the projector screen. Click OK.
8. You are now connected to AirPlay.

9. To disconnect from AirParrot2, click on button in the top left corner of the AirParrot 2 display screen.
Changing Display Settings

1. **Right click on the Desktop.**

2. **Select Display Settings.**
3. Click on “Advanced Display Settings”. Under Resolution, there will be a box that will enable you to adjust the screen to your desired settings. Display is best viewed in 1920 x 1080.
