AirPlay Mirroring from iPhone

1. Start your Apple device and turn on projector.

2. On the HOME screen, swipe up to get options for AirPlay Mirroring.
3. On the screen, click the option for AirPlay Mirroring. Make sure Bluetooth is on. This is the only way Apple devices communicate with each other.

4. Once AirPlay Mirroring is selected, a box will appear that says: AirPlay Mirroring: Mirror your iPhone on an Apple TV. The box will also display the Building, Room number, and the IP Address to connect to. Click on the option for that building, room, and IP address. (Example: Olin RM 207 10.0.2.171).

5. Once this option is selected, another box that asks for AirPlay passcode will appear on your device.
6. The projector screen will display a 4-digit passcode. Type that passcode into your device. Your device is now connected. Whatever is displayed on your device will mirror on projector screen.
Disconnecting AirPlay Mirroring from iPhone

1. On the HOME screen, swipe up to get options for AirPlay Mirroring.
2. Select “Turn Off AirPlay Mirroring”.

3. AirPlay Mirroring is now disconnected.
