Mac Address tips

Tips for finding a MAC Address

In order to register your game or media device for use on Terrier Devices Wi-Fi, you will need to find its MAC address. These instructions explain how to find the MAC address for many common game consoles and streaming devices. We also provide tips for connecting a Wi-Fi printer.

Game Consoles

Nintendo DS

To find your Nintendo DS’s MAC address, you will need a WiFi-enabled game for the Nintendo DS. From the official Nintendo WiFi website: The MAC address of the Nintendo DS can be found by going to the Nintendo Wi-Fi Connection Setup in the game’s menu. Select [Options], then [System Information]. The MAC address is displayed on the top line.

Nintendo Wii

To find the MAC address for your Nintendo Wii, follow these steps taken from Nintendo’s support site:

1. From the Wii Channel menu, select [Wii Settings] (the round button on the bottom-left of the screen with "Wii" on it).
2. Select [Internet], then [Console Settings].
3. The MAC address of the Wii console is displayed on the first line.

*Please keep in mind that the Wii can only connect to the Internet via Wi-Fi at this time.*

Playstation 3

From the PS3 main menu screen:

1. Select [Settings].
2. Select [System Settings].
3. Select [System Information].

This screen will display your PS3 MAC address.

PlayStation 4

1. Turn on your Playstation 4 without any disk in the drive and wait for the menu to pop up.
2. Navigate to the "Settings" icon (located on the far left).
3. Select the "System" icon under the Settings menu.
4. Select "System Information."
5. You will see your MAC address listed on this screen, containing letters and numbers in the format xx.xx.xx.xx.xx.xx. Write down your MAC address (LAN cable).
**Xbox 360**

To find the MAC address of your Xbox 360:

1. On your console, go to **[My Xbox]**, and then select **[System Settings]**.
2. Select **[Network Settings]**.
3. Select **[Wired Network]** or the name of your wireless network, if you are prompted to do so.
4. Select **[Configure Network]**.
5. On the **[Additional Settings] tab**, select **[Advanced Settings]**.

At the bottom of this screen you’ll see a heading called "MAC Address."
Streaming Devices or Smart TVs

Apple TV
From the main menu, choose Settings, and then click About or Network. Look for the MAC address next to "Ethernet Address" for the wired network or "Wi-Fi address" for the wireless connection. Alternatively, you may find the MAC address printed on the UPC label on the Apple TV box.

Google Chromecast
1. Tap "Devices" at the top of the screen
2. Locate the desired Chromecast
3. Tap the ‘3 dot’ icon/menu button for your device — It's located at the right of the device
4. Select Device Settings
The IP address and MAC address are located at the bottom of this screen.

Google Firestick or Puck
1. Navigate to Settings
2. Go to System
3. Select About
4. Select Network
5. Copy the MAC address and add it to your Account

Google TV
From Settings, select Network, and then Status. Your MAC address will appear on the screen.

Roku
To find your Roku's MAC address, you will need to follow the instructions from the official Roku website:

You can find your device MAC addresses on the bottom or back on your Roku player (depending upon model). A MAC address is a set of six 2-digit pairs separated by colons (e.g. 00:0D:0A:1H:3G:5C). One set is for your wireless connection and one set is for your wired/Ethernet connection, if your Roku player model supports Ethernet.

Alternatively, from the Roku home screen, select Settings> About. The MAC addresses will be listed on-screen.
**Seiki Smart TV**

From Settings, go to Setup, and then Network, and then IP address. Both the wireless and wired MAC addresses are listed on this page.

**TiVo**

From the TiVo Menu, select Settings, and then choose Phone/Network. Your MAC address will appear on the page that opens.

**Vizio Smart TV**

Press the Menu button on the remote and select Network, and then Manual Setup. The RJ45 (wired) and/or Wireless MAC address will appear on the screen.
Printer MAC addresses

Check your printer manual. This is the easiest and fastest way to find the printer’s MAC address.

Print out a configuration page. Sometimes the test page and the configuration page are the same. Print them from the printer front panel or from the computer. The front panel of the printer will likely have a configuration or tool button. Press it and scroll using the arrow keys to "Print Test Page," then select "OK". To print from the computer, navigate to the printer and right-click. Select "Properties" and choose "Print Test Page."

Locate the printer MAC address on the configuration page. It is 12 digits and can be alternatively labeled the "physical address." If the printer MAC address is not listed, find the IP address and continue to Step 4.

Open the command prompt by clicking "Start" and typing "CMD" in the "Run" line. Type in the following command: ping 0.0.0.0 (IP address). Look for the physical (MAC) address in the output that follows.
